

Cinema Grey MicroPerf

Cinema Grey MicroPerf

Acoustic Vinyl Projection Surface

<Cinema Grey is designed for today's moderate</p> output DLP and LCD projectors. This screen surface is a great choice when video images are the main source of information being projected and where ambient lighting is moderately controlled. With its specially designed grey base surface, this screen material is able to provide excellent black levels without sacrificing the white level output. Cinema Grey is washable with mild soap and flame retardant and resistant.
This material is available for Home Theater, Commercial, and Pro A/V screens
