

Cinema White

Cinema White

Vinyl Projection Surface

<Cinema White is over 30% brighter than Matte</p> White. It is a unique fabric that offers a bright, uniform image with no color shift at any viewing angle. This surface is designed to provide a higher amount of brightness for lower output projector types. Its increased reflectivity will help enhance image brightness in situations where a low level of ambient light is present. Cinema White is washable with mild soap and retardant flame and resistant.
This material is available for Home Theater, Commercial, and Pro A/V screens
