

## Stellar White 1.4 MicroPerf

## Stellar White 1.4 MicroPerf

**Acoustic Optically-Coated Vinyl Projection Surface** 

Stellar White 1.4 screen material is an opticallycoated screen surface that offers a more uniform image and reflects colors that are true to the original content. It offers high contrast and bring bright, vivacious images to your eyes. The 1.4 gain is over 40% brighter than most standard white screens; making Stellar White a great choice for all types of projectors.<br>\*\*This material is available for Cinema, Home Theater, Commercial, and Pro A/V screens\*\*<br>>
