

Stellar White 1.8 MicroPerf

Acoustic Optically-Coated Vinyl Projection Surface

Stellar White 1.8 screen material is an optically-coated screen surface that offers a more uniform image and reflects colors that are true to the original content. It offers high contrast and bring bright, vivacious images to your eyes. The 1.8 gain is over 80% brighter than most standard white screens; making Stellar White a great choice for active 3D content.

****This material is available for Cinema, Home Theater, Commercial, and Pro A/V screens****
